# Introduction | Overview

- We specialize in the supply and distribution of manual and automated valve products and accessories, serving critical industries including petrochemical, refining, midstream and upstream oil & gas, power generation, and offshore applications.

Our portfolio is designed to meet the demanding requirements of these sectors, ensuring reliability, compliance, and performance across diverse operating environments.

- Incorporated in year 2004 and provide full assembly and test of automated valve systems and accessories to your requirement, as well as supply of various range of instrumentation fluid products/ components.

OIL-TECH strives to supply an extensive range of valves to the oil and gas sector across the Asia region. We are not tied to any single ball valve manufacturer, which allows us the flexibility to source and deliver according to specific customer requirements.

This independence ensures that we can provide the most suitable solutions for diverse applications, backed by our commitment to reliability, compliance, and timely delivery.

- In addition to our extensive stockholding capabilities, OIL-TECH offers a wide range of internationally recognized and approved brand-name valves. Our inventory includes Gate, Globe, Check, Wafer Check, and Butterfly valves, ensuring that we can meet diverse application requirements across the oil and gas, petrochemical, power, and offshore sectors.

By maintaining strong partnerships with trusted global manufacturers, we provide our customers with quality-assured products, immediate availability, and reliable performance.
